

# I am a Project Manager. Is there a spot for me in Scrum?

Ana Roje Ivančić, Ognjen Bajić  
Professional Scrum Trainers, DevOps Consultants  
Microsoft MVPs for Developer Technologies

Professional Scrum Trainer  
Scrum.org

# Agenda

Meet Peter, the PM

Meet the Scrum Team

Meet the Organization

Which Path should Peter Pursue inside/outside Scrum?

Should Peter Become a

- Developer

- Scrum Master

- Product Owner

- Agile Leader

- Supportive Role

Peter Needs to Choose His Path!

# Speakers: Ana Roje Ivančić and Ognjen Bajić

In Software Development since 1996/1999

Helping teams improve DevOps practices since 2005

Worked as Dev, PM, Test, RM, SM, PO...

Microsoft MVP for Developer Technologies  
(ALM/DevOps) since 2006/2016

Professional Scrum Trainer (PST) for Scrum.org since  
2018

**Meet Peter, the PM**

# Traditional Project Manager

Manages

Plans

Reports

Monitors

Communicates

Is expected to deliver the full feature **scope** within **timeframe** and **budget**

Is accountable for project **success** or **failure**

Is responsible for **planning**, **executing**, **monitoring**, **controlling**, and **closing** projects

Leans more towards traditional/waterfall command and control processes than agile processes

**Meet the Scrum Team**

# The Scrum Team

$\leq 10$  people

Cross Functional

Self-Managing

Clear Accountabilities

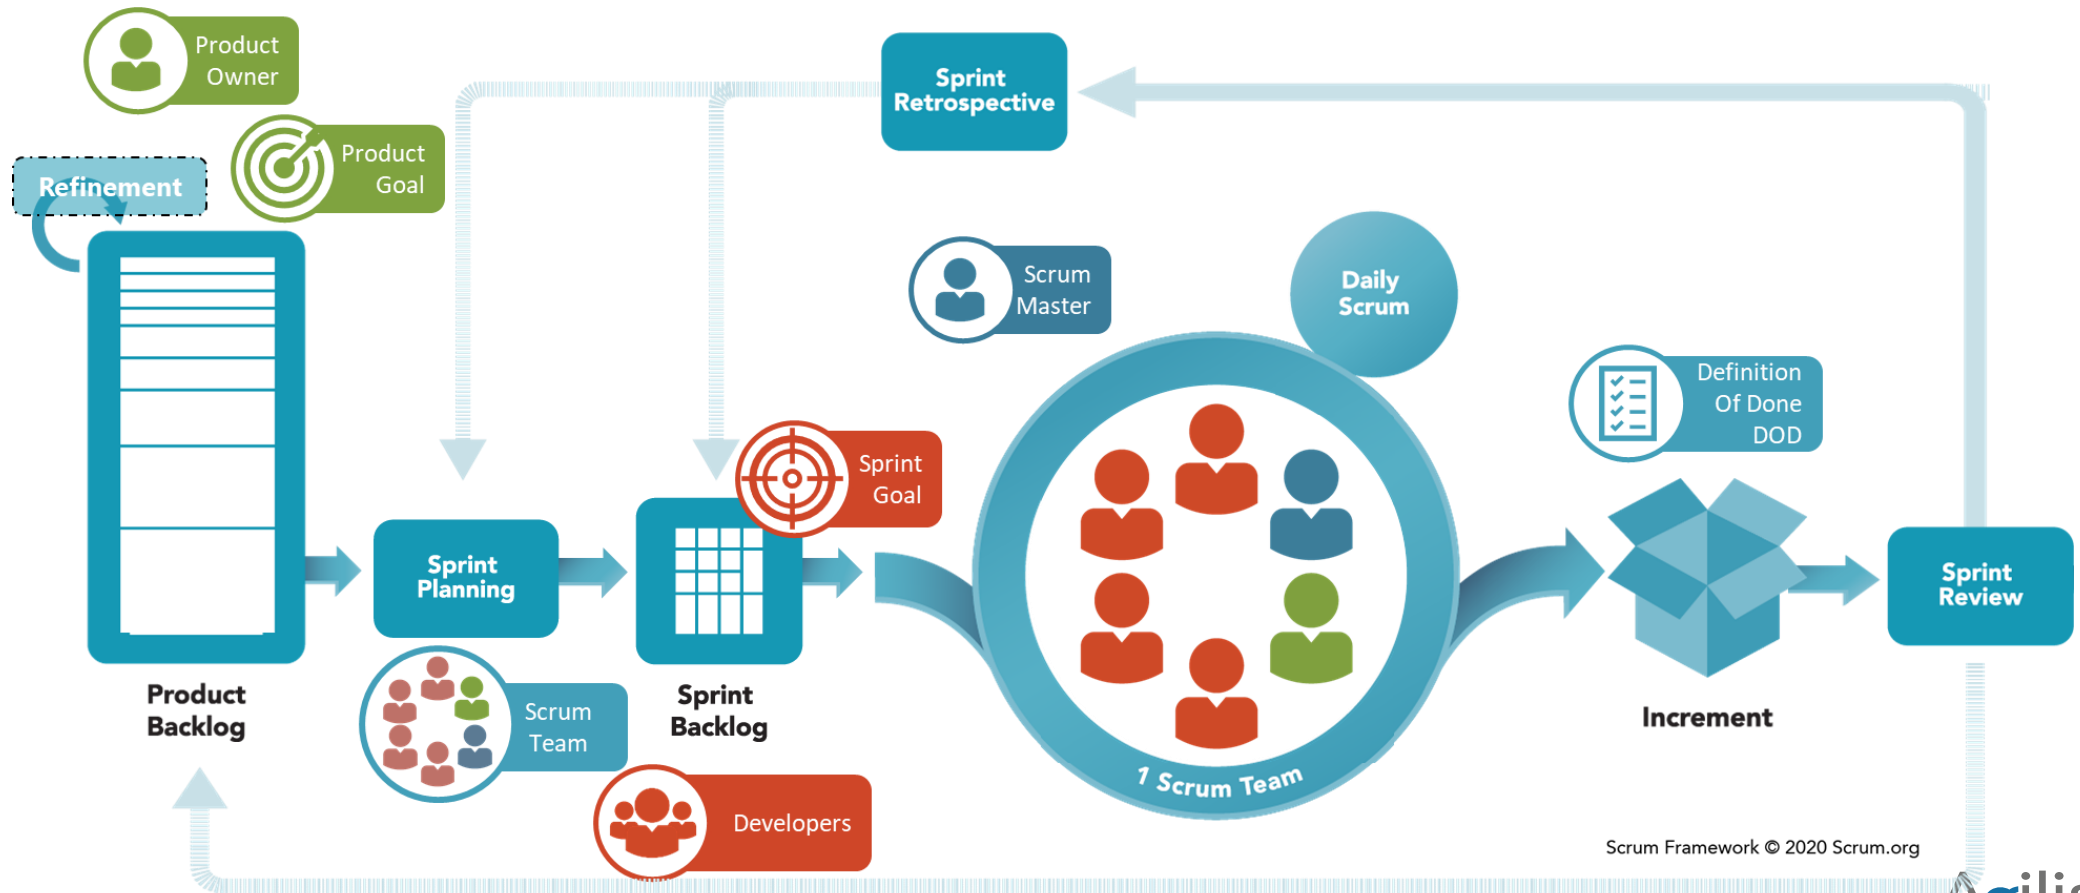

Responsible for all product-related activities

Accountable for creating a **Done Increment** every Sprint

Live according to the core Agile Manifesto Values and Scrum Values

# Scrum In A Nutshell

1. A Product Owner orders the work for a complex problem into a Product Backlog.
2. The Scrum Team turns a selection of the work into an Increment of value during a Sprint.
3. The Scrum Team and its stakeholders inspect the results and adjust for the next Sprint.
4. Repeat

# Scrum Team: Specific Accountabilities

*Maximizing the value of the Product*

Product Owner

*Creating Done Increments*

Developers

*Promote and support Scrum*

Scrum Master

**Meet the Organization**

# Organizational Models Have Changed

Hierarchical & Mechanistic

Organic & Team-Centric

# An Agile Organization is „Inverted“

## The Traditional Organization

## The Agile Organization

**Which Path should Peter Pursue  
inside/outside Scrum?**

# Peter Has Several Options

Assume one of 3 Scrum Accountabilities

Developer

Scrum Master

Product Owner

Work outside of the Scrum Team

Become an Agile Leader

Provide various services to the team and the organization

**Should Peter Become a  
Developer?**

# Developers in the Scrum Team

Do all product-related work

Analysis, Design, Development, Testing, Delivery,  
Monitoring, Maintenance, Support

Own the decision how to do work

Own all work estimates

Responsible for creating valuable, usable,  
done increments every Sprint

Responsible for quality

Continuously inspect and adapt

Work results and how they work

# Working as a Developer is Not Easy

Expected to act as Professionals

Need to become a cross-functional group

Continuously build all necessary skills  
and knowledge to do the work

Required to self-manage

Manage themselves and their work

Expected to thrive collectively

Be committed, focused, open,  
respectful, and courageous

Collaborate and share knowledge

Solve problems together

Trust each other

Be transparent about their work

Share objectives, success, and failure

# Should Peter Become a Developer?

Yes!

If his passion and (previous) experience leans towards doing the „work“

There are many types of work needed to develop a product Increment!

Peter could be a valuable subject matter expert

Peter could be skilled in business processes, analysis, assessing quality, working with data, etc.

No!

If he is not a team player and needs to manage (work, people)

**Should Peter Become  
a Scrum Master?**

# Scrum Master in the Scrum Team

Implements Scrum in team(s) and the organization

- Establishes Scrum practices, rules, and values and ensures they are understood and followed

Accountable for the Scrum Team's effectiveness

- Coaches team members in self-management
- Ensures the team is cross-functional
- Helps the team focus on improving quality
- Supports the team in becoming healthy

Causes impediment removal

- Helps the team (learn how to) remove impediments by themselves
- Removes impediments only (!) when the team cannot remove them by themselves

Shields the Scrum Team

Shares responsibility for success and failure

# Many Stances of a Scrum Master

# Should Peter Become a Scrum Master?

Yes!

If his passion leans towards helping and supporting people or organizations in their continuous improvement

Peter might realize he wants to be a change agent

Peter might embrace the vision to work for a „greater good“

Peter might enjoy facilitation

Peter might be a gifted teacher/coach

No!

If he cannot let go of his need to command and control who does what, when, and how

SM is not just PM  
with an Agile hat!

**Should Peter Become  
a Product Owner?**

# Product Owner in the Scrum Team

Maximizes the value of the product

- Ensures Developers are working on the right thing all the times

- Chooses what and when to release

Manages the Product Backlog

- Develops and communicates the Product Goal

- Creates, clearly communicates, and orders Product Backlog items

- Works with Developers to define and understand work

Represents stakeholders and customers to the Developers

# Product Management Encapsulates Many Things

Analyzing the  
Industry &  
Competition

Product  
Strategy

Maximizing  
Revenues &  
ROI

Release  
Planning

Identifying  
Customers &  
Their Needs

Forecasting  
& Feasibility

Creating the  
Business Case

**MANY ARE COVERED BY SCRUM!**

Strategic  
Product  
Planning

Identifying  
Product  
Requirements

Creating a  
Roadmap

Release  
Execution

Auditing  
Results

Sustaining  
the Product

Product  
Launch

Customer  
Retention

Naming &  
Branding

Outbound  
Messaging

Defining  
Product  
Features

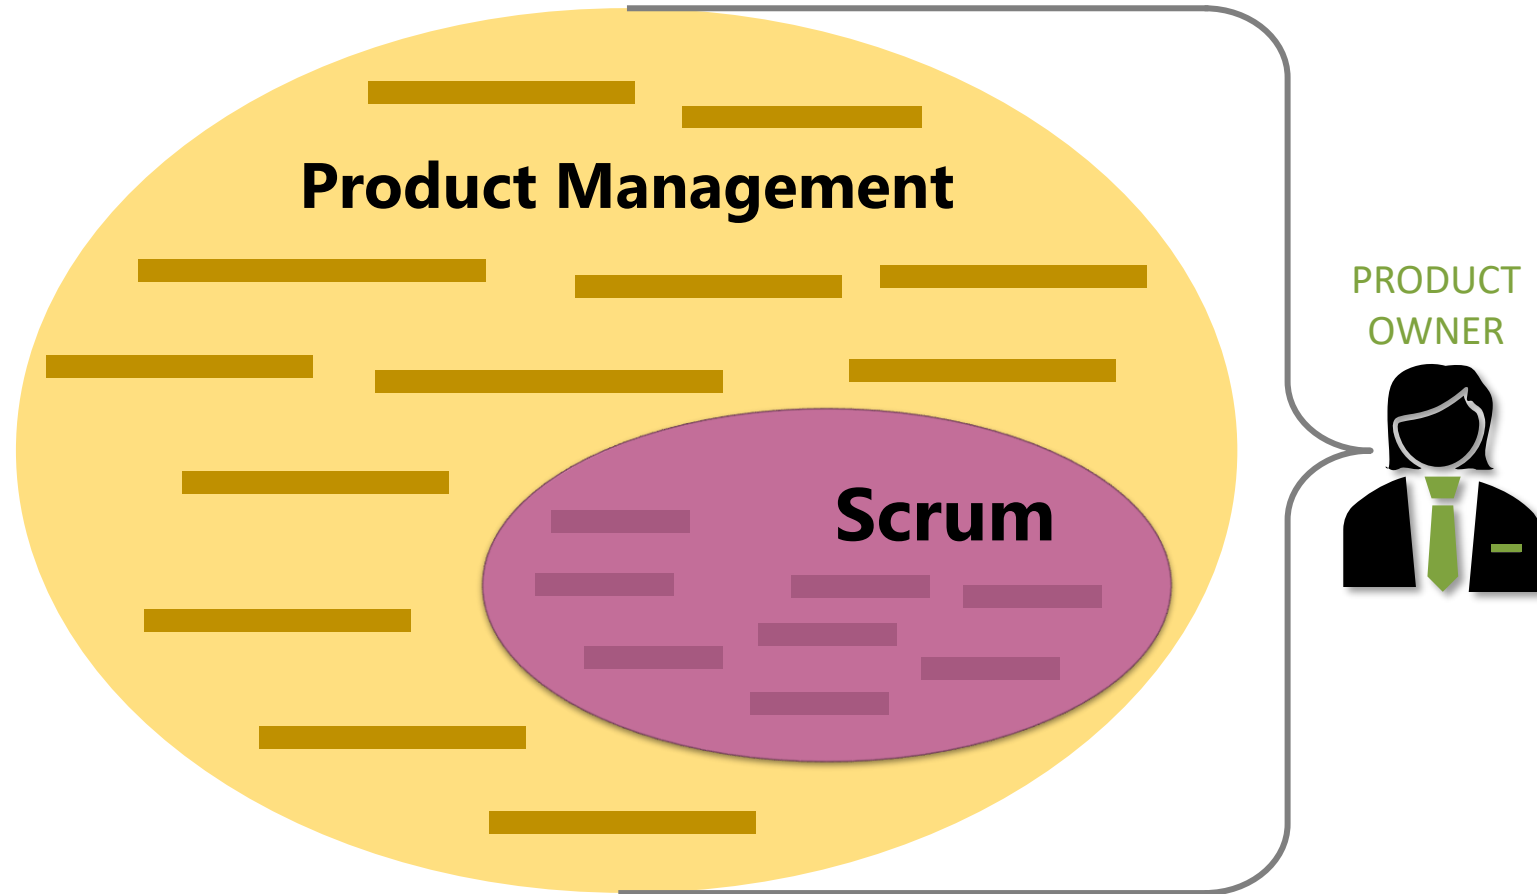

Product  
Retirement

# Product Owner Is an Agile Product Manager

Communicates vision and value to the Developers

Works with Developers to capitalize on the latest technology

Leverages Scrum for frequent product inspection and adaptation

# Should Peter Become a Product Owner?

Yes!

If his passion leans towards understanding and maximizing the business value of the product

- Peter might be gifted to see the „bigger picture“

- Peter might (already) have authority and accountability to make decisions

- Peter might be great at collaborating with stakeholders

- Peter might be well-organized, detail-oriented, and analytical

No!

If he cannot shift from project delivery and micromanagement to product development and leaning on self-management teams

**Should Peter Become  
an Agile Leader?**

# Agile Leader in an Organization

Lead with Agile principles and values

- Nurture a culture of experimentation and learning

- Foster the need to change and evolve

Steer everyone towards shared vision and goals

- Help focus on outcomes, not outputs

- Help focus on delivering customer value

Create environments where self-managing teams can thrive

- Properly structure the organization

- Focus on growing people (skills)

- Help with removal of impediments

Delegate responsibilities and decisions

- Trust and rely on people

# Agile Leaders Closely Collaborate with the Scrum Teams

## Partner with Scrum Masters

Promote Scrum Values to organizational values

Provide for an environment where Scrum Teams can grow

Help with removal of impediments

## Partner with Product Owners

Delegate responsibility for the entire value chain to POs

Align different parts of the organization with different operating models (agile vs. traditional)

Resolve cross-departmental dependencies

# Should Peter Become an Agile Leader?

Yes!

If his passion leans towards leadership and entrepreneurship

Peter might have always wanted to be more than just a PM

Peter might see the „*Greater Goal*“ and provide vision and mission

Peter might be capable of inspiring people

No!

If he cannot lead by example, step aside, and delegate decisions and responsibilities

**Should Peter Support Scrum  
(Teams) at the Organizational  
Level?**

# (Ex) PMs Can Help Scrum Teams in Many Different Areas

Coach or actively support Product Owners

- Funding and budget, and schedule
- Resource management, schedule, and long-term planning
- Interactions with customers (contracting, formal communication, etc.)
- Reporting status to higher management and boards
- Managing project portfolios and governance
- Working in a scaled agile environment

Navigate teams through broader organizational change initiatives

# (Ex) PMs Can Help the Wider Organization

## Support the Management

- Reporting portfolio status to higher management

- Liaising between Scrum Teams and Management

## Support the business (Customer facing)

- Contracting, legal work, facilitating a formal relationship

## Help remove organizational impediments

- Leverage their knowledge and experience with processes and tools

- Leverage their connections across the organization

## Bridge the gap between agile and non-agile teams

**Peter Needs to Choose  
His Path!**

# Peter Has Several Options

Assume one of 3 Scrum Accountabilities

Developer

Scrum Master

Product Owner

Work outside of the Scrum Team

Become an Agile Leader

Provide various services to the team and the organization

# Thank you!
